Enhancing Community Safety: Daisy Mountain Fire and Medical District's New Planned Station in East Desert Hills/West Cave Creek

The Daisy Mountain Fire District (DMFD) is taking a significant stride towards enhancing public safety within the areas that we proudly serve. The District has begun the process of building a new fire station to serve the East Desert Hills/West Cave Creek community.

Addressing the Need:

East Desert Hills has witnessed substantial growth in recent years, and with it comes the heightened demand and need for emergency services. The existing infrastructure of the DMFD, while commendable, has been stretched to its limits. Recognizing the need for expanded coverage, the District has set its sights on establishing a new fire station at 24th St and Cloud Rd that will serve as a strategic location to protect lives and property.

Station #144: A Symbol of Unity:

The new fire station, aptly named "Fire Station #144," will be the seventh station within the district service area spanning over 250 square miles. This station is poised to become a symbol of unity and collaboration for years to come. The decision to split the operational costs between Daisy Mountain and the Town of Cave Creek underscores their shared commitment to safeguarding the lives and properties of the residents of all of our area communities.

The architecture and design of Station #144 have been meticulously planned to adhere to and meet the evolving needs of the communities it will serve. Equipped with state-of-the-art facilities and cutting-edge technology, the station will house specialized fire trucks and highly-trained medical teams, ensuring a rapid and effective response to emergencies.

Navigating Challenges:

The journey towards this ambitious project has not been without challenges. Initially identifying a suitable piece of land posed a hurdle, compounded by past and current economic financial constraints. However, the commitment of DMFD to provide for the safety and service of the community spurred us to explore alternative avenues.

After a series of discussions and witnessing the devastating impact of wildfires in the District and in the neighboring Town of Cave Creek in the summer of 2020, the District purchased a piece of land that could aptly serve both communities. This symbolizes the spirit of continued mutual support and resource-sharing between the two communities.

Construction Partnerships:

In July 2023, the District selected Willmeng Construction and Perlman Architects, two reputable companies with proven track records in designing and building structures of significance. This partnership aims to bring the vision of Fire Station #144 to life efficiently and with the highest standards of safety and functionality.

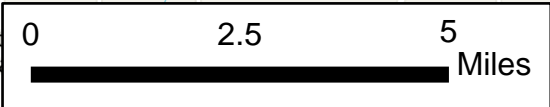

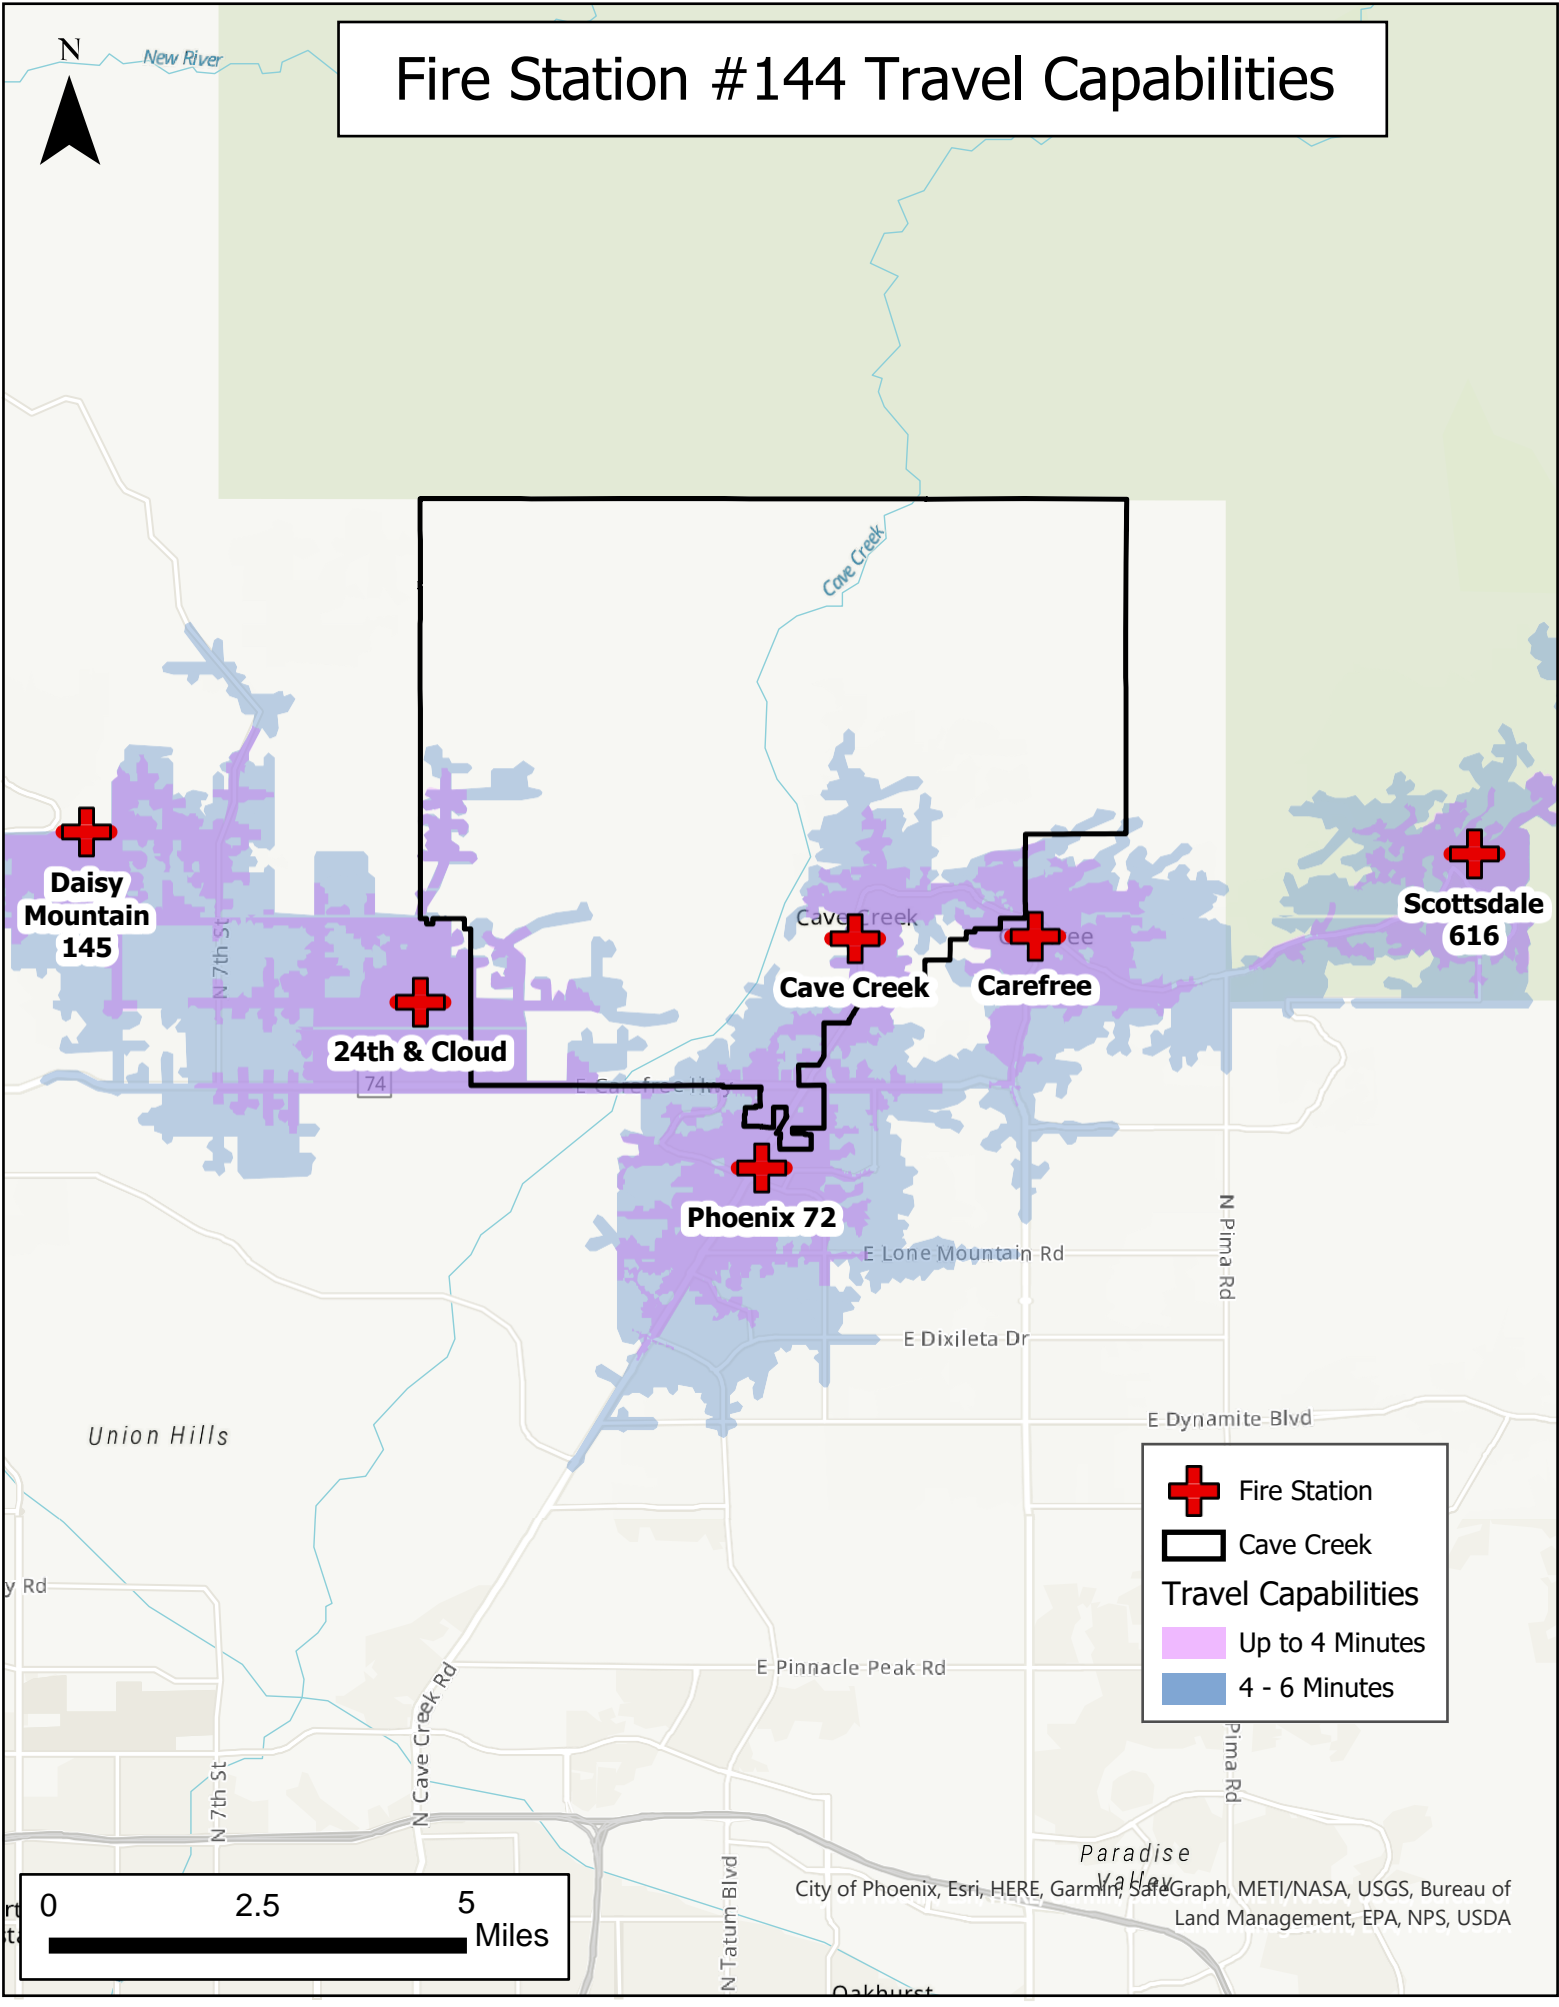

Anticipated Benefits:

The benefits of this new fire station extend beyond East Desert Hills/West Cave Creek. By strategically placing Station #144, the DMFD aims to reduce response times, enhance emergency services, and create a safer environment for residents and businesses alike. The station will not only serve as a firefighting hub but also as a center for community outreach and education on fire safety.

Looking Towards the Future:

As construction progresses, the anticipation for Station #144 grows. The residents of East Desert Hills and neighboring areas can rest assured that they will soon (Winter 2025) have an additional layer of protection, thanks to the dedication and foresight of the Daisy Mountain Fire District.
